

# **Type ZLB Load Cell**

Flintec load cells are designed to meet the most stringent accuracy requirements.

ZLB load cells are available in the capacities 20 kg to 200 kg and include Accuracy Classifications GP, C1 and C3 according to OIML R 60.

They offer aluminium construction with industrial potting, making them suitable for use in tough industrial environments.

It allows very low profile platform design and offers advantages in all kinds of weighing applications.

The Flintec calibration technique (in mV/V/ $\Omega$ ) eliminates time consuming corner calibration in multiple load cell systems.
