Rubber element with flange 52-05 and SB4 load cell combined with base plate 52-00

## Product Description

Flintec load cell supports are designed to prevent unwanted forces from affecting load cell performance.

The type 52-05 is a self aligning rubber element with flange, combining excellent load introduction with low profile design.

Especially designed for the SB4, SB5, SB6, SB14 and SLB load cells.

Material: steel, zinc plated; alternatively stainless steel.
