

## Type 55-01-10 Weigh Module

Pre-assembled module

Flintec load cell supports are designed to prevent unwanted forces from affecting load cell performance.

The Type 55-01-10 is a self aligning weigh module, with excellent load introduction.

The module is especially designed for using Flintec rocker column load cells in hopper and tank weighing applications. The module incorporates an integrated bumper stop eliminating the need for check links thereby offering highest possible precision.

The Weigh Module will be shipped pre-assembled; ready for installation by bolting or welding.

Material: steel, zinc plated; alternatively stainless steel.

## **Important Features**

- Capacities 7.5 t, 15 t and 22.5 t.
- Very easy to install.
- Very rugged.
- Especially designed for hopper and tank weighing.
- Integrated bumper stop for highest accuracy.
- Integrated lift off protection.
- Load cell replacement requires minimum lifting height.
- W&M certified.
